Age: 22 | Bolinawan, Cambuntan 2A, Carcar City, Cebu, Philippines  
josephjohn.laborada@gmail.com | +63 960-360-9748 | github.com/moshiverse

## EDUCATION HISTORY

Cebu Institute of Technology – University  
Bachelor of Science in Information Technology (BSIT)  
Aug 2022 — May 2026

## TECHNICAL SKILLS

**Programming / Web Technologies:** Java, C, C++, C#, JavaScript, Python, PHP, HTML, Tailwind CSS, SQL  
**Frameworks:** Spring Boot, ReactJS  
**Tools & Platforms:** GitHub, Railway, Supabase (PostgreSQL), AI Automation (Activepieces)  
**Other Skills:** Figma, Canva, UI/UX Design, Wireframing

## NON - TECHNICAL SKILLS

**Soft Skills:** Problem Solving, Collaboration, Communication, Time management, Adaptability, Flexibility

## EXPERIENCE

IT Intern – Knowles Training Institute, Singapore (Remote),  
WordPress Developer,  
January 19, 2026 – April 20, 2026

- Developed a responsive booking website using WordPress and Elementor Plugins.
- Designed user-friendly UI/UX layouts for desktop and mobile devices.
- Implemented email request handling for user inquiries and bookings.

## ACADEMIC PROJECTS

### IEEE Docs Evaluator

- Developed the frontend of an AI-powered platform that enables students and instructors to submit, review, and assess software engineering documents
- Designed and implemented a responsive user interface using React.js and Vite, incorporating Google OAuth 2.0 for secure role-based access control
- Integrated Google Drive API to streamline document submissions and Google Sheets API to automate feedback tracking and record management
- Utilized Axios for seamless communication with backend services and real-time presentation of evaluation results
- Deployed the application on Vercel and supported an efficient local development workflow to facilitate team collaboration

### InTurn.AI – AI Chatbot

- Developed an AI-powered internship assistant platform with a Streamlit-based frontend for internship hour tracking, mentor communication, and automated report generation
- Built backend services using FastAPI and Uvicorn to support real-time chat functionality and API request handling
- Integrated MongoDB to provide scalable storage for internship records, user data, and chat conversations
- Designed a conversational interface for natural language hour logging and implemented business logic to calculate remaining internship requirements
- Leveraged OpenAI GPT-4 to deliver AI-generated recommendations and feedback, incorporating input validation and prompt-routing mechanisms

## CERTIFICATIONS / TRAININGS

AWS Academy Graduate – Cloud Foundation  
AWS Academy Graduate – Cloud Architecting  
TESDA AI Training Badge
